

Akram HADDOUCHE

Robotics & Automation Engineer

Intelligent systems engineer (M.Sc. E3A, **ranked 3rd of class**) specialized in **industrial automation, manufacturing and robotics**. Two years of hands-on experience designing, commissioning and troubleshooting **industrial control & supervision systems** in production environments, with a strong root-cause analysis mindset. **Actively seeking a permanent position (CDI).**

LANGUAGES

French Bilingual
English TOEIC C1

INTERESTS

Hiking, swimming.

Astronomy, technology.

PROFESSIONAL EXPERIENCE

Automation & Supervision Engineer (Apprenticeship)

SAUR | September 2024 – September 2026

- End-to-end delivery of automation, SCADA and remote-management projects (costing / design / PLC programming / on-site commissioning).
- Renewed the automation and supervision of the Flexanville wastewater treatment plant on a live site: migration to Schneider M340 PLC and Topkapi SCADA
- Execute hardware maintenance on control stations and deploy new physical systems on the plant floor
- Developed AI-based solutions to improve service operations and diagnostics.

Drone Swarm Project

Paris-Saclay University | November 2025

Built a collaborative flight-control system for a swarm of DJI drones.

- Inter-drone communication via ROS and topic management.
- Trajectory dynamics and synchronization, tested in real flight conditions.

Industrial Maintenance Intern

Castel Groupe | March 2023 – May 2023

- Diagnosed and resolved failures on production lines (corrective and preventive maintenance), tracing symptoms back to root causes.
- Introduced a predictive-maintenance approach based on data analysis to anticipate equipment failures.
- Maintenance of Fanuc robots in the PET production line

Industry 4.0 Intern

Centre for the Development of Advanced Technologies | July 2022 – September 2022

- Production systems in Industry 4.0.
- Study and integration of collaborative robots.

EDUCATION

M.Sc. E3A — Intelligent Systems for Automotive and Aeronautics

Paris-Saclay University | 2024 – 2026

B.Sc. Physics — Electronics, Electrical Energy and Automation

Paris-Saclay University | 2023 – 2024

Engineering cycle in Automation & Preparatory Classes (CPST)

École Supérieure des Sciences Appliquées | 2020 – 2023

Highly selective French Graduate School of Engineering

- Laureate of the national competitive exam for admission to top engineering schools.

EXTRA-PROFESSIONAL ACTIVITIES

- Organizing member of the CTA Association.
- Programming and mathematics instructor.
